This paper

Motivation

- Many people have “an” idea of North
- But little real experiences of it

Question

- What is living in the North actually like?
  - Some point
  - Another point
- Where does the idea of North start and end?

Approach

- Interview five people who have had direct exposures to the North
- Build and estimate model of Northern migration

Preview of findings

1. Finding 1
2. Finding 2
3. Finding 3

Literature

1. Neighborhood effects and residential segregation

2. Financial constraints, housing market segmentation, and spatial inequality

Literature

1. **Neighborhood effects and residential segregation**

   Neighborhoods matter: Chetty, Hendren, Kline and Saez (2014) Chyn and Katz (2021) Rothstein (2017) Policies to de-segregate: Baum-Snow and Lutz (2011) Bergman, Chetty, DeLuca, Hendren, Katz and Palmer (2024) Bézy, Levy and McQuade (2024) Chetty, Hendren and Katz (2016) Sources of segregation: Bayer, Casey, McCartney, Orellana-Li and Zhang (2024) Boustan (2010) Davis, Easton and Thies (2024) Ferreira, Kenney and Smith (2024) Rothstein (2017)

   Contribution: Increasing rental housing supply in the private market reduces residential segregation at scale

2. Financial constraints, housing market segmentation, and spatial inequality

Literature

1. Neighborhood effects and residential segregation

   Contribution: Increasing rental housing supply in the private market reduces residential segregation at scale

2. **Financial constraints, housing market segmentation, and spatial inequality**

   Quantitative spatial models: Almagro, Chyn and Stuart (2024) Bayer, Ferreira and McMillan (2007) Couture, Gaubert, Handbury and Hurst (2024) Diamond (2016) Diamond and Gaubert (2022) Gechter and Tsivanidis (2023) Fonseca, Liu and Mabille (2024) Models of housing market segmentation and frictions: Calder-Wang (2022) Greenwald and Guren (2021) Levy (2022)

Literature

1. Neighborhood effects and residential segregation

   Contribution: Increasing rental housing supply in the private market reduces residential segregation at scale

2. Financial constraints, housing market segmentation, and spatial inequality

   Contribution: Distributional analysis accounting for spatial sorting, endogenous amenities, and homeownership preferences

Background

TBD.

Data

TBD.

Roadmap

Empirics: Interviews
- The Northern expedition of 1882
- Glenn Gould's idea of North
- The U.S. price-to-rent ratio

Model
- Estimation
- Model results
